New Children's Off-Road Vehicle Training Track in Ocotillo Wells State Vehicular Recreation Area

BORREGO SPRINGS – The youth training track at California State Parks' Ocotillo Wells State Vehicular Recreation Area is now open.

Children ages 12 and under are able to learn to ride off-road vehicles and perfect their skills safely away from more experienced riders. The terrain is similar to that encountered throughout the park, which makes for a smooth transition to other areas of the park once they are ready. The clearly marked track is bordered by straw bales and fences for added safety.

For the comfort of parents and others who watch the children ride, California State Parks has provided shade armadas, picnic tables and a restroom just outside the fenced area. Interpretive shelters are also available, offering educational and interpretive information about the park.

The track is only open to ATVs and motorcycles 70 cc and under. Children must be supervised by an adult. The area will be open sun up to sun down. These and other rules are posted at the entrance.

The track is located at the corner of Ranger Station Road and Quarry Trail. For more information visit www.parks.ca.gov or call (760) 767-5391.
